

Amendments to the Abstract

Please amend the abstract at page 43 as follows:

~~This invention has its object to inform the user before~~ Before completion of a print process of a digital image, a user can be informed that a cable can be disconnected from a digital camera or printer, and that the digital camera is ready to photograph. To this end, a ~~PD photo-direct (PD)~~ printer (1000) of this embodiment transmits a JobDataDone command indicating that all digital images to be printed are received ~~to~~ in a digital camera (31012) (909). Upon reception of the JobDataDone command, the digital camera (3012) displays, on a display (35), information indicating that a cable (5000) can be disconnected from the digital camera (3012) or PD printer (1000).
